

## Calithera Biosciences to Report Fourth Quarter and Year-End 2016 Financial Results on Thursday, March 16, 2017

March 10, 2017

SOUTH SAN FRANCISCO, Calif., March 10, 2017 (GLOBE NEWSWIRE) -- Calithera Biosciences, Inc. (Nasdaq:CALA), a clinical-stage pharmaceutical company focused on discovering and developing novel small molecule drugs directed against tumor metabolism and tumor immunology targets for the treatment of cancer, today announced that the Company's fourth quarter and year-end 2016 financial results will be released on Thursday, March 16, 2017. Company management will host a conference call on Thursday, March 16, 2017 at 1:30 p.m. Pacific Time/ 4:30 p.m. Eastern Time to discuss the financial results and other recent corporate highlights.

The press release and live audio webcast can be accessed via the Investor section of the Company's website at [www.calithera.com](http://www.calithera.com). The conference call can be accessed by dialing (855) 783-2599 (domestic) or (631) 485-4877 (international) and referring to conference ID 83671541. Please log in approximately 5-10 minutes before the event to ensure a timely connection. The archived webcast will remain available for replay on Calithera's website for 30 days.

### About Calithera Biosciences

Calithera Biosciences, Inc. is a clinical-stage pharmaceutical company focused on discovering and developing novel small molecule drugs directed against tumor metabolism and tumor immunology targets for the treatment of cancer. Calithera's lead product candidate, CB-839, is a potent, selective, reversible and orally bioavailable inhibitor of glutaminase. CB-839 takes advantage of the pronounced dependency many cancers have on the nutrient glutamine for growth and survival. It is currently being evaluated in Phase 1/2 clinical trials in combination with standard of care agents. CB-1158 is a first-in-class immuno-oncology metabolic checkpoint inhibitor targeting arginase, a critical immunosuppressive enzyme responsible for T-cell suppression by myeloid-derived suppressor cells. Arginase depletes arginine, a nutrient that is critical for the activation, growth and survival of the body's cancer-fighting immune cells, known as cytotoxic T-cells. CB-1158 is currently in a Phase I clinical trial. Calithera is headquartered in South San Francisco, California. For more information about Calithera, please visit [www.calithera.com](http://www.calithera.com).
