Calithera Biosciences Appoints Blake Wise to Board of Directors

September 21, 2017

SOUTH SAN FRANCISCO, Calif., Sept. 21, 2017 (GLOBE NEWSWIRE) -- Calithera Biosciences, Inc. (Nasdaq:CALA), a clinical-stage pharmaceutical company focused on discovering and developing novel small molecule drugs directed against tumor metabolism and tumor immunology targets for the treatment of cancer, announced today the appointment of Blake Wise to the company's Board of Directors. Mr. Wise currently serves as President and Chief Operating Officer of Achaogen.

"Blake's extensive oncology therapeutic marketing and commercialization experience will be valuable as we advance our development programs towards potential commercialization," said Susan Molineaux, PhD, President and Chief Executive Officer. "We look forward to his guidance during this period of growth of the company as we work towards creating a new class of drugs that fight cancer and expand therapeutic options for patients."

Mr. Wise joined Achaogen in 2015 and currently serves as President and Chief Operating Officer. Prior to joining Achaogen, Mr. Wise served as Vice President, Cross BioOncology at Genentech, where he led cross-portfolio oncology initiatives, including key account management, marketing, managed markets, companion diagnostics, pipeline commercialization, and long-term oncology strategy. Mr. Wise also held several other leadership positions at Genentech including Senior Director, Franchise Head and Life Cycle Leader of the Lytics franchise and as a Sales Director in BioOncology, Marketing Director in Cystic Fibrosis and Immunology, and Interactive Marketing Director. Prior to joining Genentech, Mr. Wise worked in consumer marketing, e-commerce and online marketing in leadership positions at Gap, Inc. and Webvan. Mr. Wise received a Bachelor of Arts degree in Business Economics from University of California, Santa Barbara, and a Masters of Business Administration degree from University of California, Berkeley, Haas School of Business.

About Calithera
Calithera Biosciences, Inc. is a clinical-stage pharmaceutical company focused on discovering and developing novel small molecule drugs directed against tumor metabolism and tumor immunology targets for the treatment of cancer. Calithera's lead product candidate, CB-839, is a potent, selective, reversible and orally bioavailable inhibitor of glutaminase. CB-839 takes advantage of the pronounced dependency many cancers have on the nutrient glutamine for growth and survival. It is currently being evaluated in Phase 2 clinical trials in combination with standard of care agents. CB-1158 is a first-in-class immuno-oncology metabolic checkpoint inhibitor targeting arginase, a critical immunosuppressive enzyme responsible for T-cell suppression by myeloid-derived suppressor cells. Arginase depletes arginine, a nutrient that is critical for the activation, growth and survival of the body's cancer-fighting immune cells, known as cytotoxic T-cells. CB-1158 is being developed in collaboration with Incyte Corporation and is currently in a Phase 1 clinical trial. Calithera is headquartered in South San Francisco, California. For more information about Calithera, please visit www.calithera.com.

Forward Looking Statements
Statements contained in this press release regarding matters that are not historical facts are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "may," "will," "expect," "anticipate," "estimate," "intend," "poised" and similar expressions (as well as other words or expressions referencing future events, conditions, or circumstances) are intended to identify forward-looking statements. These statements include those related to the timing of Calithera's clinical trials, the clinical and commercial potential of its product candidates, Calithera's ability to fund its clinical programs, and Calithera's receipt of clinical data from its clinical trials. Because such statements are subject to risks and uncertainties, actual results may differ materially from those expressed or implied by such forward-looking statements. The potential product candidates that Calithera develops may not progress through clinical development or receive required regulatory approvals within expected timelines or at all. In addition, clinical trials may not confirm any safety, potency or other product characteristics described or assumed in this press release. Such product candidates may not be beneficial to patients or successfully commercialized. The failure to meet expectations with respect to any of the foregoing matters may have a negative effect on Calithera's stock price. Additional information concerning these and other risk factors affecting Calithera's business can be found in Calithera's periodic filings with the Securities and Exchange Commission at www.sec.gov. These forward-looking statements are not guarantees of future performance and speak only as of the date hereof, and, except as required by law, Calithera disclaims any obligation to update these forward-looking statements to reflect future events or circumstances.
